

In [1]:

```
#Program to generate odd numbers from m to n using while loop
m=int(input("Enter the starting Number m : "))
n=int(input("Enter the starting Number n : "))
print("Odd numbers between ",m,"and",n," are: ")
while(m<n):
    if(m%2==0):
        m-=1
    m+=2
    if(m<n):
        print(m)
```

```
Enter the starting Number m : 4
Enter the starting Number n : 11
Odd numbers between  4 and 11  are:
5
7
9
```
